Subject: Health Mandate re: conscience protection
Date: Monday, September 26, 2011 10:58:12 AM

Dear Sirs and Madams,

We strongly object to the treatment of contraception as a disease that needs to be prevented and mandated as a "preventive Health service". We don't want to pay for contraception through our insurance premiums and tax dollars!

Also a strong conscience protection clause should be included for religious employers and also all employers and insurers with moral or ethical objections. Religious hospitals and clinics are the backbone of health care in many parts of this country and we cannot afford to lose them because they cannot morally or ethically follow government mandates such as this.

Sincerely,
Michael and Mary Gaida
